

Condeco Meeting Room Screens.

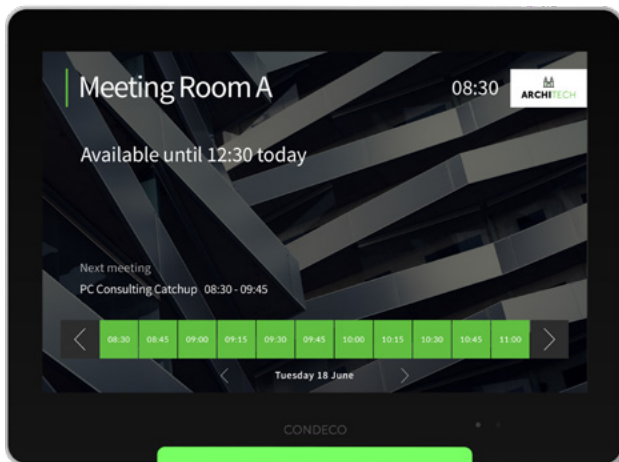

A clear view of every room.

Take the quick route to securing the meeting room you need, for the exact time you need it. Condeco Meeting Room Screens clearly display room availability, and act as a booking point for future meetings, removing the hassle of clashes and, no-shows.

Your solution to meeting conflicts.

Our sleek, crystal-clear, meeting room screens remove all possible doubt from meeting room availability. All the key information is there: meeting title, host name, start time and duration... and absolutely no ambiguity.

These screens seamlessly connect to Condeco meeting room software, meaning everyone can get the most up-to-date meeting information on their own devices, and can make bookings remotely that will appear on the screen automatically.

Get clear information

Check booking information like time and organiser at a glance on the screen, and see current availability instantly through the bright LED light displays.

Increase room availability

Cut the wasted space of no-shows. If you don't check in, Condeco automatically releases the room for alternative use.

Instant meeting control

Book through the screen in an instant using an RFID access card or PIN number, and either end or extend existing meetings in seconds.

Key features.

Visible meeting information

Get a clear view of detailed meeting information, outside the room on a high-resolution, 10.1" touch screen.

180° status lights

See if the room is available, booked or occupied from a distance through red, amber and green LED lights with 180° visibility.

RFID access card reader

Complete a booking contactlessly by tapping an RFID card on a device to check in.

Quick booking

See availability of the room across the day and easily book by selecting available times.

Automatic room release

When an organiser fails to check in within a preset timeframe, the room is freed up for others to book and use.

End or extend

Extend your booking on the screen if you need more time, or use the screen to end the meeting, releasing the room for others to book.

Manage and monitor

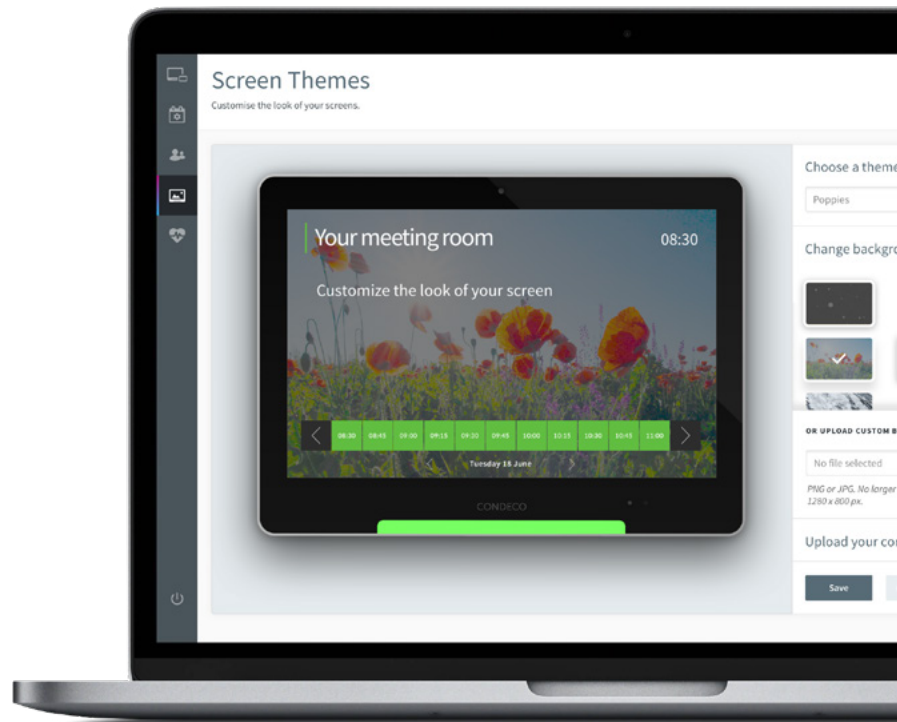

All your screens can be managed from a cloud-based dashboard, including usage statistics, device health monitoring, remote restart and automatic software updates.

Customizable screen themes

Apply your corporate branding or other designs to a single screen, a group of screens or all your screens for a professional look.

Room usage reports

The essential meeting data gathered by each screen can be used to gain insights on how the room is used, no-show rates and other key metrics.

Screen Manager.

Health monitoring

Screens regularly report health statuses, helping your inhouse and remote administrators manage and monitor all your screens, wherever they work from.

Secure activation

Easily activate your screens with a few simple steps. Set up all major settings remotely then activate the device with a secure, time-limited activation code.

Set up business rules

Set your screens up the way you want, across privacy settings, business hours, if and how far people can book ahead on the device, identification, check-in requirements, and more.

Manage remotely

Screens can be restarted remotely, and optional daily email alerts highlighting any issues can be configured. That way, administrators can ensure all screens are up-to-date and functioning fully, wherever they're located.
